REPORT OF THE EPSOM PUBLIC LIBRARY TRUSTEES

The Trustees of the Epsom Public Library present their annual report.

By the death, in October, of Mr. Warren Tripp, the library lost a trustee of the library for many years, one who was always interested in its welfare and active in its service.

The trustees acknowledge the receipt of many periodicals for which they thank the senders.

More books than usual have been added by purchase during the year, and the circulation has been much larger.

Respectfully submitted,

JOHN W. GRIFFIN,
FLORENCE L. YEATON,

July, 1928. *Auditor.*

REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens:

I herewith submit my ninth annual report of the schools of Epsom, for the year ending June 30, 1928.

There were maintained during the year, four schools, for a school-year of 36 weeks, with no change in the teaching force.

The total school enrollment was 104, (50 boys and 54 girls), with a daily average attendance of 92.98 per cent.

The schools were in session on an average of 346 half-days.

Length of School Year

The School Laws of New Hampshire, Chapter 117.

"The school board of every district shall provide standard elementary schools for at least thirty-six weeks in each year at such places in the district as will best serve the interests of education and give to all the pupils within the district as nearly equal advantages as are practicable."

The school board has endeavored to so arrange the school calendar that this law may be carried out.

The assignment of the pupils to four schools increased the per cent of attendance and improved the work done by the pupils.

The great decrease in rural population presents to the school board a serious problem in determining the number of rural schools to maintain.

Frank O. Lowden, former governor of Illinois, speaking before the National Educational Association at Washington on Rural Education said, "The trek city ward is already under way. If it shall go on so rapidly as it has in the last five years, the next generation will witness a farm popu-

lation largely composed of the physically and mentally unfit.

"Educators have not been blind to this distressing contrast. In some sections of the country consolidated country schools have been established. These schools have marked a vast improvement in the life of the community, for farmers are as eager to give their children a good education as are those who live in the cities and the towns."

Health

The school nurse, Miss Douillette, has done faithful and efficient work both in the school and in the home.

The health of the child in a large measure determines his regularity of attendance, his behavior and his ability to do his work.

Efficient supervision and instruction in matters of health should have an important place in every school organization.

School Activities

The teachers were earnest and worked for the best interest of the pupils.

The noon and recess periods offer to both teacher and pupils a fine opportunity for pleasure and profit. Athletic games,—baseball, volley ball, basket ball and other games may be promoted and on stormy days educational games,—arithmetic, geography, history, spelling, and cross-word puzzles may be enjoyed.

The success of these supervised school periods depends upon the initiative and the skill of the teacher.

The standardized tests given during the year in all the fundamentals showed an improvement in the work done in these branches during the year.

The school attendance was good. Most of the absences were caused by sickness.

The cases of truancy were confined to a few families who gave as a reason, their inability to provide proper clothing.

In conclusion I express my appreciation for the co-operation and assistance given to me by the teachers, school board and citizens.

Respectfully submitted,

HENRY S. ROBERTS.
